Tashkent State Medical University

Sustainability and Climate Action Policy

Tashkent State Medical University is committed to advancing environmental sustainability and climate responsibility through a comprehensive, institution-wide strategy aligned with global sustainable development goals.

The University recognizes its role in addressing climate change and environmental challenges by integrating sustainability principles into its governance, education, research, and campus operations.

Strategic Commitments

The University has adopted a proactive approach to environmental sustainability through the following key priorities:

- **Energy Efficiency and Carbon Reduction**
- Implementation of energy-efficient technologies, including LED lighting systems and optimization of energy consumption across campus facilities, with a long-term goal of reducing carbon emissions.
- **Sustainable Resource Management**
- Promotion of responsible consumption of water, energy, and materials, alongside structured waste reduction and recycling initiatives.
- **Green Campus Development**
- Continuous improvement of campus infrastructure to support environmentally friendly practices, including green spaces, biodiversity protection, and sustainable building management.
- **Sustainable Mobility**
- Encouragement of environmentally responsible transportation options for students and staff.
- **Education and Research Integration**
- Incorporation of sustainability and public health-related environmental topics into academic programs, as well as support for research addressing environmental and climate-related health issues.

Implementation and Monitoring

The University ensures the implementation of this policy through:

- Regular monitoring of environmental performance indicators
- Institutional oversight and coordination across departments

- Continuous improvement based on measurable outcomes

Impact and Outcomes

As a result of initial sustainability measures, the University has achieved:

- Increased awareness of environmental responsibility among students and staff
- Improved energy efficiency across academic buildings
- Strengthened integration of sustainability topics into medical education and research

Transparency and Accessibility

This policy is publicly accessible and reflects the University's commitment to transparency, accountability, and continuous progress in sustanability and climate action.
