POLICY ON DIVESTMENT FROM CARBON-INTENSIVE ENERGY INDUSTRIES

1. General Provisions

1.1. This Policy establishes the principles for incorporating environmental sustainability into investment and financial asset management decisions made by Tashkent State Medical University within its authority.

1.2. The Policy is based on the principle of not making new investments in coal and oil extraction, processing and carbon-intensive energy industries directly related to these activities.

1.3. This Policy does not apply to public funds, third-party assets, pension or other independent funds, or investment decisions that are not directly controlled by the University or fall outside its authority.

3. Key Principles

• New investments: New direct investments made within the University's authority shall not be directed to coal or oil extraction and processing activities.

• Screening: When investment proposals are reviewed, the principal activities of the recipient entity and its direct links to carbon-intensive energy industries shall be assessed.

• Review of existing assets: Where existing investments or financial assets exist, they shall be assessed within the limits of applicable law, contractual obligations and the University's authority.

• Phased approach: Any change to existing assets shall be made only through a separate decision following relevant legal, financial and contractual review.

4. Implementation

4.1. Where the University has the relevant authority, the responsible unit preparing an investment or financial asset decision shall review the nature and business activities of the proposed investment.

4.2. If a proposed investment is directed towards coal or oil extraction, processing or directly related carbon-intensive activities, the proposal shall be reconsidered in accordance with this Policy.

4.3. If the University has no authority to manage such investments or has no investment portfolio, this fact shall be documented in writing by the responsible unit. This fact alone does not mean that divestment from an investment portfolio has taken place.
